WORLD ENVIRONMENTAL DAY

World environment day was first established to be celebrated every year by running some effective campaigns by the United Nations General Assembly and United Nations Environment Programme (UNEP) in the conference on Human Environment began from 5th to 16th of June at United Nations in 1972. It was first time celebrated in 1973 with the particular theme “Only one Earth”. Since 1974, the celebration campaign of the world environment day is hosted in different cities of the world.

The students and staff members of RISE KRISHNA SAI PRAKASAM GROUP OF INSTITUTIONS participated in plantation drives to make their surrounding green.

On the Occasion of World Environment Day June 5, 2015. The students and staff members of RISE KRISHNA SAI PRAKASAM GROUP OF INSTITUTIONS participated in plantation drives to make their surrounding green.

On 4th June we conducted elocution, painting, and seminar programs, students are actively participated on this programs.

On 4th June we conducted elocution, painting, and seminar programs, students are actively participated on this programs.

Students raised slogans and displayed posters regarding different environmental issues. An awareness rally was held by the staff and students. The rally aimed at encouraging the public to actively participate in the celebration and also keep their environment clean and healthy to lead a better life.

An awareness rally was held by the staff and students. The rally aimed at encouraging the public to actively participate in the celebration and also keep their environment clean and healthy to lead a better life.

The chairman of our college gave a good message to the students, “**Everyone knows the importance of our nature. It consists of all the living beings in earth, which are mutually dependent on each other. But due to the pollution caused by human beings, many species are becoming extinct and the global climate is also changing at a very fast rate. It’s influencing our health and also going to give a long term effect on our future. We know that millions of people in the earth depend on forest for their livelihood. Every living being is dependent on trees. Only the tree can make their food itself. But, we people are degrading the forest very much**”.

The chairman of our college gave a good message to the students

Principal of the college interacted with the students and spoke about threats to the environment, he said, “I will not make it a lengthy speech. I want to say one thing on this great day that try to plant trees as much as you can, because we depend on tree fully. Try to plant at least one tree in any special occasion like on your birthday, anniversary etc”.

Hod of the science and humanities said,” This year’s theme of World environment day is ““Seven Billion Dreams. One Planet. Consume with Care”. ”. Likewise, in 2014, the theme was “Raise Your Voice Not The Sea Level.”; and so on....

Firstly we need to understand the meaning of SEVEN BILLION DREAMS. Today, we have 7 continents on planet earth and the overall population has been nearly over 7.125 billion (2010) which signifies 7 billion people living on 7 continents. Since every human being has lived so far with only one dream which is to live better, to eat better and to consume better. Majority of them never cared about environment. Secondly, ONE PLANET CONSUME WITH CARE:- Despite of the fact that we are more than 7 billion by now, we have only one planet to live and survive.

We have limited place, limited food, and limited shelters. If we keep on using natural resources like we do today, a day will come when our own grand children shall be forced to live homeless with hunger prevailing in the society. So it's better to consume whether food or fuel with care and responsibility. Stop the wastage, use according to need not greed.

Faculty of Environmental studies said, "Everyone knows the importance of our nature. It consists of all the living beings in earth, which are mutually dependent on each other. But due to the pollution caused by human beings, many species are becoming extinct and the global climate is also changing at a very fast rate. It's influencing our health and also going to give a long term effect on our future. We know that millions of people in the earth depend on forest for their livelihood. Every living being is dependent on trees. Only the tree can make their food itself. But, we people are degrading the forest very much".

The theme for 2015 was '**Seven Billion Dreams; One Planet; Consume with Care**'.

At last, I want to thank all of you once again to honor me as a guest in this prestigious meeting.

Thank You All, And Happy Environment Day 2015 Once Again.
