

# CHEMISTRY LABORATORY

The Chemistry laboratory is a spacious hall including a store room for safe keeping of explosive & corrosive chemicals in view of the laboratory safety. Each working table in the laboratory is well furnished with reagent racks & well connected with water supply.

Students can acquire good practical knowledge about estimations, preparations and instrumentation, which are having industrial applications. It gives the fundamental concept of preparation of some organic compounds on small scale.

The Chemistry laboratory is well equipped with various instruments other than the usual glassware & chemicals, which includes:

- Colorimeter
- Turbidity meter
- Potentiometer
- P<sup>H</sup> meter
- Conductivity meter
- Hot Air Oven
- Analytical Balance

### **Instruments present in the Lab**

- Colorimeter
- Turbidity meter
- Potentiometer
- PH meter
- Conductivity meter
- Hot Air Oven
