

International plastic bag free Day 2021

The International Plastic Bag Free Day is observed on **July 3** annually. The day is observed to raise awareness about the grave issues of plastic pollution and the serious threat that it poses to the natural environment ranging from land to marine life. Plastic pollution is a global catastrophe and it is a man-made one. By estimation, 500 billion plastic bags are used on a global scale. This has an extremely detrimental effect on the environment, wildlife, and quality of human life indeed.

Most of us use them every day, the thin plastic bags used by almost every retailer we visit. Whether we're shopping for groceries or the newest Prada, you can almost guarantee that you'll be leaving the store with a plastic bag stuffed full of your new goodies

Recycling

1. DO recycle clean grocery, dry cleaning, and newspaper bags. Clean plastics bags can be easily recycled, don't be afraid to put them in your recycling bin instead of in the trash.
2. DO stuff multiple plastic bags into one to prevent them from flying away and causing litter or clogging the recycling machinery.

The entire point of recycling is to reduce the unnecessary waste in the environment. Start reducing early by making sure loose bags don't get caught in the wind while they're waiting to be picked up.

3. DO put long-cut shredded paper in a clear bag with your recycling. The paper will be recycled right along with the bag. If you have tiny confetti-like paper, you can put that in your food and yard cart.
4. DO put out extra recycling next to your cart in a paper bag or cardboard box if your cart is full.
Don't be tempted to throw your extra recycling in the trash, it'll get picked up just fine if it's all together.
5. DON'T toss a bag full of random recyclable items into the recycling cart. That's the easiest way to slow down recycling centers. The workers at the recycling facility can't see what's inside the bag to easily sort them. Empty the bag into the recycling cart instead.
6. DON'T put plastic bags in your food and yard waste cart. It can ruin the compost.
7. DON'T put biodegradable bags in your food and yard cart. Biodegradable does not necessarily mean compostable. Some biodegradable bags require heat and moisture beyond compostable bags to break down.
8. DON'T put compostable pet waste bags in your food and yard cart. Don't even use compostable pet waste bags, as pet waste belongs in the garbage and compostable bags only turn into compost at compost facilities.

On this International Plastic Bag Free Day 2021, let us take a step that will prove beneficial for future generations as well.

2021 Theme:

In RISE Krishna Sai Prakasam Group of Institutions, International Plastic Bag free day is celebrated with a Theme "Plastic on Planet - Say No to Plastic" and "Elimination of Single Use Plastic".

Due to the prevalence of Covid, on this day it is resolved to conduct awareness on plastic among students by conducting online Slogan Writing Competition.

The Quiz was kept open to students from 17th to 19th July 2021 and 80 students have responded. The responses are good and the participation of the students is highly appreciated.
