INTRODUCTION

Engineering students at RISE Krishna Sai Prakasam were given industry experience as part of their education. Along with the theory they learn and the practical activities they do in the lab to practise the theory, it is essential for students to obtain the opportunity to practise in industries/organizations.

Students should be able to gain the information and skills necessary to participate in the job market as a result of this experience and exposure.

POLICY

Every student at RISE Krishna Sai Prakasam Group of Institutions will be encouraged to complete a minimum of four weeks of industrial practice/service in a relevant sector or organisation.

Students should be guided for internships by the Training and Placement department.

Interactions with interns should be monitored by the department.

OBJECTIVES OF INTERNSHIP

In order to provide students an opportunity to put what they've learned in the classroom into practise in a real-world setting.

In order to give students with hands-on, real-world learning experiences from practitioners in their respective fields of study.

To introduce students to the working world, typical procedures, career possibilities, and work ethics in their field of study.

To help students improve their job prospects.

To make it possible for interns to be hired by the companies where they do their work experience.

PROCEDURE

Student internships are sought for by the Training and Placement Department.

In order to provide internships for students, the TP cell reaches out to different companies.

When companies respond to the notice, the options for students to connect with the company are displayed.

Based on their semester grades, students are assigned a company of their choice.

The head of the department assigns internship students to professors according to their area of expertise.

GUIDELINES FOR STUDENTS UNDERGOING INTERNSHIP

The student must complete an internship of at least four weeks during summer break of their third year or whenever a possibility is there. Before beginning an internship, students must obtain guidance from their department head or internship coordinator, whichever is appropriate.

It is the student's duty to see to it that the internship is carried out in a way that is ethical, conscientious, trustworthy, and fully devoted.

To adhere to the organization's norms and regulations and to assure meaningful participation during the internship period.

To maintain the good name of RISE Campus by doing the assignment in a professional and ethical manner.

To keep the organization's information private and not to distribute / share it with anybody else.

To be in charge of the safety and security of the company's assets.

INTERNSHIP PROGRAM DISCIPLINE PROCEDURES

As long as the student is on-the-job training, he or she is solely responsible to the company in which they are working. During the training term, the student must adhere to the same rules and regulations as all other employees of the firm.
